

Lesson Previewing & Planning

How many activities should my child do each day?

Grades	Language Arts	LA Extensions	Math	Science	Social Studies
Preschool	Level One: 83 activities --- Level Two: 92 activities				
Kindergarten	199 activities	* See below	81 activities	* See below	* See below
First	376 activities	289 activities	102 activities	16 activities	* See below
Second	179 activities	271 activities	120 activities	16 activities	16 activities
Third	179 activities	104 activities	217 activities	133 activities	107 activities
Fourth	112 activities	114 activities	259 activities	116 activities	137 activities
Fifth	122 activities	142 activities	210 activities	141 activities	287 activities
Sixth	127 activities	136 activities	272 activities	72 activities	116 activities
Seventh	127 activities	74 activities	302 activities	* See below	87 activities
Eighth	64 activities	85 activities	357 activities	* See below	* See below

* The subject does not contain activities at this grade level. Check the next or previous grade level for materials covering this subject.

In 4 simple steps, you can use the table above to figure out how many lessons your child should do each day.

1. Locate the number of activities in your child's grade level in the table above.

Total Number of Activities by Subject				
Language Arts	LA Extensions	Math	Science	Social Studies
_____	_____	_____	_____	_____

2. Decide on the number of weeks in your child's school year.

o # of weeks _____

3. Divide the number of activities for each subject by the number of weeks:

Number of Weekly Activities by Subject				
Language Arts	LA Extensions	Math	Science	Social Studies
_____	_____	_____	_____	_____

4. Divide the number of activities for each subject by 5 days to calculate the number of daily lessons per subject:

Number of Daily Activities by Subject				
Language Arts	LA Extensions	Math	Science	Social Studies
_____	_____	_____	_____	_____
